## IIMS-Admission

### Admission Policy

IIMS believes that a fair and transparent admissions system is essential for all applicants. Management education is a valuable commodity: it can affect salary, job security and power to influence society but it varies considerably from institution to institution, in terms of both the learning experience and graduate outcomes. The sector is diverse and choice of course and institution matters. In this context, it is vital that all stakeholders in the admissions process – applicants, parents, schools, colleges, teaching and admissions staff – believe that the system is fair.

Ethical admission is the cornerstone of IIMS. We try and reach to that class of candidates who are eligible for minimum qualifying criteria and passionate towards higher education. Rather than employing best-class approach, IIMS recommends bottom -top approach to be used. The "bottom-top" refers to minimum academic ability, experience, and diversity of the students accepted. IIMS takes into consideration national eligibility tests' performance and a desired composition of the student body in terms of such characteristics as race, sex, age and geographic location of applicants, thus we have different Common Entrance Test centers across India. However, the preference is given to the potential and the willingness of the students for enrollment. The minimum qualified applicants would be admitted first, and the process continued until a "bottom-top" has been selected consistent with the minimum enrollment requirements.

IIMS strongly believes that we should provide, consistently and efficiently an appropriate mechanism, the information applicants need to make an informed choice. It includes the institution's admissions policy and detailed criteria for admission to courses, along with an explanation of admissions processes which are clearly stated in IIMS Prospectus. It includes a general indication of the weight given to prior academic achievement and potential demonstrated by other means as well as student's performance in GD and PI conducted in Common Entrance Test. The latest available information is provided about the entry qualifications of applicants accepted on each course.

Our fair admissions system enables institution to select students who are able to complete the course as judged by their achievements and their potential. Ability to complete the course is an essential criterion for admission. In assessing applicants' merit and potential, we consider other factors in addition to examination results, including: the educational context of an applicant's formal achievement; other indicators of potential and capability and how an individual applicant's experiences, skills and perspectives could contribute to the learning environment through GD and PI. Thus, IIMS could able to maintain above 90% result for final examinations from more than a decade.
